

NO JAVASCRIPT THEN NO SERVICE

```
<noscript>
  <style type="text/css">
    #GameOverChrome {display:none;}    //gameoverchrome is the name of
the whole wrapper.
    body{background-image:url(Pic/NOjavascript.png);background-
position:center;background-repeat:no-repeat;background-color:white;}
  </style>
  <div class="noscriptmsg">

</noscript>
```

the no script shows up only if user has disabled javascript...If your website is core based in javascript and you decided that you dont want users use it without javascript then you may do tha above noscript.
