PhP sql bring array to string

```
$GetPlayerName="SELECT PlayerName FROM accounts WHERE
Username='$Username'AND Password='$Password'";
      $GoGet=mysqli_query($conn,$GetPlayerName);
      $GoG=mysqli_fetch_assoc($GoGet);
      $Go=sprintf($GoG['PlayerName']);
```

sprintf turns it into a string while printf doesnt.
